

RVI58X and RSI58X Series

| Standard Technical Data | |
|-------------------------|---------------------------------------|
| Scanning method | Optical |
| Output type | Push-pull or RS-422 |
| Pulse count | Max. 5000 pulses |
| Connection technology | Cable |
| Housing design | Ø 58 mm |
| Shaft type | Solid shaft and recessed hollow shaft |
| Rotational speed | Max. 6000 rpm |
| UL | ■ |

For detailed data and description, see the datasheet. Further products can be found online at www.pepperl-fuchs.com.

Highlights

- Can be used in hazardous, potentially explosive atmospheres with gases or dusts
- Compact housing design for confined spaces
- High signal accuracy with up to 5000 pulses
- Flexible application and mounting options
- Can be used for longer cable lengths via RS-422 electrical interface with 10 to 30 V supply voltage

Brief Description

Compact and Flexible

This incremental rotary encoder delivers up to 5000 pulses per revolution through either a push-pull output or an RS-422 interface. Despite its design for explosion-hazardous areas, it is no larger than the corresponding standard version. This makes it ideal for integration in plants with limited space. Due to its 58 mm standard housing, it is also ideally suited for retrofitting a machine for use in Ex zones.
