

# 78E Series

### Standard Technical Data

<b>Scanning method</b>	Optical
<b>Output type</b>	Analog, CANopen, DeviceNet, Ethernet, PROFIBUS
<b>Singleturn</b>	Up to 16 bit
<b>Multiturn</b>	Up to 14 bit
<b>Connection technology</b>	Cable, cable gland
<b>Housing design</b>	Ø 78 mm
<b>Shaft type</b>	Solid and recessed hollow shaft
<b>Rotational speed</b>	Max. 3000 rpm
<b>Degree of protection</b>	IP66
<b>Operating temperature</b>	-40 °C ... 70 °C

For detailed data and description, see the datasheet. Further products can be found online at [www.pepperl-fuchs.com](http://www.pepperl-fuchs.com).

## Highlights

- Removable connection cover: flexible mounting and cabling on-site
- Simple maintenance: separation of the cable and rotary encoder means there is no need to replace the entire device
- ATEX, IECEx, and Ex NEPSI certification for worldwide use in Zone 1/Zone 21
- Wide range of variants for easy adaptation to any application
- Specially developed for the offshore sector
- Robust design for use in extreme conditions

## Brief Description

### Flexible Mounting and Cabling

The sensor is suitable for speeds of up to 3000 rpm and is designed for a temperature range of -40 °C to 70 °C. It complies with protection type Ex d and meets the international ATEX, IECEx and Ex-NEPSI requirements for gases according to Zones 1 and 2, and for dusts according to Zones 21 and 22. The modular design with removable connection hood facilitates installation and maintenance. With the fieldbus versions, bus coding can be freely programmed directly on-site. The rotary encoder is certified for explosion-hazardous areas (Group II) and firedamp-sensitive mines (Group I).
